## PREVIOUS SUCCESSES

- Accelerated delivery of multi-million dollar 5 year program into 18 Months, necessitating hiring additional 4 employees and purchasing 3 major pieces of capital equipment
- Increased production 25%+ through initiatives on multi-axis machining and tooling technologies
- Development of processing for critical Energy component, consisting of 4 dissimilar weld joints, critical machined features after weld and Thermal spray process development
- Prototype and production run of experimental D.O.D part, involving large hogout and finishing of 3d surfaces. Part machining takes approx. 250 hours of machining to complete.

---

## CORE COMPETENCIES

Complex machining and assembly of low-mid volume production runs. Below is a short list of common product manufactured at Agile Engineering.

- Aerospace Actuation
  - Cylinders
  - Reservoirs
  - Pistons
  - Sleeves
  - Bodies
  - Trunnions
  - Fittings
  - Housings
  - Pistons
- Aerospace Controls
  - Latches
  - Followers
  - Strikers
  - Gearbox
  - Covers
  - Handles
- Energy
  - Fuel Nozzles
  - Manifold Cartridge
  - Cross Fire Tube
  - Swirlers
  - Burner Components
  - Igniters
  - Flanges
